

India & Green Technology – Smart Cities

Challenges- Opportunities

- An important part of lost resources (+50%) can be recovered
- Solar energy to our planet is 1,5 h world energy production
- We learned to use solar energy even in (cloudy) Europe
- Power generation India is growing at 10%/y – 1/5 per capita vs B
- Growing urbanisation is offering opportunities
- High energy prices forced us to be creative
- Planet earth is offering opportunities: geothermal, hydro, tide..
- Europe learned to recycle / waste becomes materials
- Risk of investing vs risk of non investing
- Europe has something to offer to India
